## Community Provides Exterior & Interior Design Input

The Bond School Design Advisory Committee met in September to provide input regarding the exterior and interior designs for Pleasant Run and West Main Elementary Schools.

Later that week, the district hosted a meeting to gather input from the community regarding the exterior and interior designs of Pleasant Run and West Main Elementary at the Recreation Center.

During these meetings, the architects showed images of existing school facilities as examples of possible design options. The images included samples from traditional, contemporary and modern buildings. People were asked to provide input regarding the following areas:

1. Use of Materials
2. Use of Glass
3. Roof Types
4. Approach to the Building
5. Scale of the Building
6. Use of Color
7. Exterior Stair Treatment
8. Exterior Learning Environment
9. Interior use of Color
10. Signage
11. Interior Windows
12. Ceiling Types
13. Learning Stairs

The architects considered the comments and developed three exterior design options to present to district trustees during a Board Workshop.
